The BT Watcher Pro is a high performance Watchdog System. BT Watcher Pro is an advanced, web based, central management system with an intuitive interface which is quick, easy and effective to setup, configure, monitor and maintain it. The system is ideal for large computer networks, home networks and industrial networks. The BT Watcher Pro can be customized to your

needs. You can specify what policies and thresholds should be enforced in the system. BT Watcher Pro is very robust. It can detect and respond to hardware failures, communication failures, even malware. BT Watcher Pro will monitor network and hardware conditions. It will warn you of potential problems. It will trigger alerts to help you identify the root cause of the

problem. If the problem cannot be resolved immediately it will automatically take corrective action. This can include reboot of network devices or even shut down of computers. It is possible to monitor and maintain several network devices and computers at the same time. You can view the status of a network device or computer and even restart it if required. BT Watcher Pro can

be configured to operate as a stand alone system. It can be configured to operate as a part of a firewall. It can also be configured to operate as a part of a more complex system. This can be a stand alone system or a network appliance. BT Watcher Pro can be configured for Windows or Linux. BT Watcher Pro has a built in web server. You can configure it to receive and send emails and

faxes. You can monitor your network remotely with the built in web browser. You can schedule automated tasks. You can access and control BT Watcher Pro remotely via the web browser. BT Watcher Pro has a unique security feature. If the local user is logged in and has a valid account the system will not restart or shutdown any network devices until he/she logs out. This prevents system

administrator from restarting network devices or shutting down computers without the knowledge of the local user. BT Watcher Pro has many other features. It can run on a private network or a public network. It can be used by large organizations as a network security system. BT Watcher Pro will monitor network conditions. It will warn you of potential problems. It will

trigger alerts to help you identify the root cause of the problem. If the problem cannot be resolved immediately it will automatically take corrective action. This can include reboot of network devices or even shut down of computers. Multimedia & Design/Video Editing/Effects... The Snap Graphics Animation

Flex GIF Animator is a small, easy to use graphics application that allows you to create stunning animations and icons. With only two interface windows, you can easily create and preview your creations, export your finished projects to a variety of formats or publish them online for viewing later. You can use a variety of

effects, including some that are not available in Photoshop, to turn simple images and text into cool, animated products. Vector graphics are fully supported, as are filters and selections. If you have a video file, you can also use the application's built-in previewer to capture frames of your video and insert them into your project. Features: -Create and preview animations and icons. -Export your projects to

a wide variety of formats: SWF, QuickTime Movie, FLC, EXE, AVI, Image files. -Export your project to HTML. -Import GIF, JPEG, TGA, PNG, and BMP files. -Import Photoshop and Macromedia Flash brushes. -Create frames from video files. -Create custom shapes in the Charts section. -Import vectors and create text that looks like a hand-drawn illustration. -Place objects using

a position library. -Create mask-based, gradient-based, reflection, and watercolor effects. -Apply simple and advanced image-based effects. -Use the built-in color picker to select colors. -Apply effects to images or frames using a Color Mask or Quick Effects. -Set your own layer Opacity using the Color Picker. -Create various effects by using a dodging, burning, and

lightening tool. -Modify the brightness, saturation, and color balance of images using the Color Picker. -Import an image into a graphics design project and edit it as a new layer. -Use the Charts section to create charts. -Draw your own shapes on the Canvas. -Set the appearance of vector images in the Canvas. -Use the Brush Manager to apply brushes to your project. -Add, edit, and

delete brush presets. -Save and load brushes. -Access Brushes and Swatches palettes. -Animate with the Move tool, the Warp tool, and the Vector Path tool. -Scale images with the Zoom tool. -Adjust images with the Image Size tool. -Apply various filters to images. -Change the Color Mode of images

What's New In Flex GIF Animator?

Flex GIF Animator provides graphics designers with a toolbox capable of creating animations such as banners or buttons and exporting them to a number of formats including SWF (Shockwave), MOV (QuickTime), FLC (Autodesk), EXE, AVI or image files like BMP, JPG, TGA or PNG. One of the best features of Flex GIF Animator is the powerful brush engine that can help you

achieve amazing results while working on your design. It also supports Photoshop brushes, thus you can easily import them into your projects. In order to perform retouching operations, the included dodge, light, blur or saturation modifier really come in handy. The Effects section of the application sports several options such as form / image based effects, particle system, warp or morph. Vector

graphics are also supported alongside 2D and 3D text with its corresponding 3D effects like drop shadow, glow and other filters. You can easily capture frames from your video files and import them into your project. Furthermore, Flex GIF Animator helps you add images directly from your drives. The optimization process assists you in achieving the desired file size with instant preview of

compression ratio and results. Moreover, Flex GIF Animator generates HTML code for your animation in case you want to publish it on your web page. Of course, this particular application comes with drawbacks as well. The interface, while comprehensive, tends to get crowded really fast and also does not facilitate the designing process. Some effects may not work and the final

product may also differ from the prospect you have in mind. Flex GIF Animator Description: Flex GIF Animator provides graphics designers with a toolbox capable of creating animations such as banners or buttons and exporting them to a number of formats including SWF (Shockwave), MOV (QuickTime), FLC (Autodesk), EXE, AVI or image files like
